

My name is **Mohamed Ibrahim Youssef**.

I joined ALSondos Foundation for orphans with special needs in 2019/4/24. **I'm seven years old now.**

Mohamed is blind and suffers from mental and motor disabilities. He also suffers from brain electricity.

He was unable to speak or move - after doing physiotherapy and speech therapy sessions, his condition has improved and he is able to walk and move properly.

He is able to communicate with others after speech sessions and skills development, and is still receiving them.

Mohamed would like to say:

I love patriotic songs very much and I love to sing.

I love surrogate mother 'Summer' very much because she is always by my side - she makes me feel safe and happy.

My favorite foods are chicken panne + boiled eggs + strawberry yogurt.

I love games that makes sounds.

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
