

My name is **Youssef Reda Ibrahim**. I joined ALSondos Foundation for Orphans with special needs in 2019/6/26. I'm two years old now.

Youssef suffers from a congenital defect in the arm, which led to the absence of the formation of the forearm and the right hand with the presence of the elbow joint.

His condition requires installation of an immovable prosthesis.

Youssef is now able to talk and interact with those around him thanks to speech and skill development sessions.

He is also able to move thanks to physiotherapy sessions.

Youssef is still receiving speech and physiotherapy sessions and skills development.

Youssef would like to say:

My favorite colors are red and orange.

I love surrogate mother 'Dina' very much.

My favorite fruit is **apple.**

I am very happy when someone comes to visit me or play with me and I hope they spend more time with me.

Lastly I'm very thankful to be part of Al-Sondos Foundation for Special Needs family, and thankful to all our sponsors.
