

My name is Atef Youssef Thabet. I joined ALSondos Foundation for orphans with special needs in 2019/12/3. I am two years old now.

Atef suffers from weakness in the muscles of the legs

He also suffers from incomitant strabismus, he needs to wear a medical glasses.

He was unable to speak because he suffers from a speech delay, but thanks to the speech sessions he received.

Atef became able to pronounce some words and understand what we say to him.

He is also able to move without help.

He is still receiving speech and skill development sessions

**Atef would like to say:**

I love and enjoy playing puzzle and listen to children songs

My favorite fruit is banana.

**I love surrogate mother 'Fadya' very much. She takes care of me and plays with me a lot**

**Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.**
