

My name is **Majed Ibrahim Youssef**. I joined ALSondos Foundation for orphans with special needs in 2021/11/8. **I'm two years old now.**

Majed suffers from bowed legs and needs medical treatment and follow-up every two months until the age of three years. He may need surgical intervention to repair bow legs.

He also suffers from a lack of iron.

From the side that we are pleased with in Majid's case, he is able to distinguish between shapes and know the difference between images and shapes.

He is also able to imitate the sounds and movements of those around him.

Majed is still receiving speech and skill development sessions to improve his abilities.

Majed would like to say:

My favorite fruit is apple

I love and enjoy playing puzzle , I am able to distinguish between shapes and group them together to form the shape of a puzzle.

I also like to imitate the movements and voices of the people I love like my surrogate mother 'Hasnaa' i love her very much.

my favorite color is green.

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
