

My name is Yazid Ahmed Mahmoud. I joined ALSondos Foundation for orphans with special needs in 2020/2/13. I'm four Years old now.

Yazid suffers from a physical and mental disability as a result of a decrease in the growth of white matter in the brain.

He also suffers from increased brain electricity, difficulty in swallowing, involuntary movements, and continuous body tremor.

He also has astigmatism in both eyes and partial atrophy of the optic nerve.

He is now wearing glasses.

His condition has improved and now he can sit by himself and pay attention to the sounds around him.

Yazid is still receiving speech and skill development sessions and physiotherapy sessions.

Yazid would like to say:

I love my surrogate mother 'Aya' so much

My favorite fruit is boiled apple

My favorite game is to swing on a toy horse.

Lastly I'm very thankful to be part of Al-Sondos Foundation for Special Needs family, and thankful to all our sponsors.
