

My name is Adham Yasser Ali. I joined ALSondos Foundation for orphans with special needs in 2020/3/18. I'm two years old now.

**Adham suffers from a delay in the growth of white matter in the brain and seizure convulsions, mental and motor delay - after doing physiotherapy and speech therapy sessions his condition has improved.**

**He started walking on his own without help, and can also pronounce some words.**

**We are happy with his progress because he is able to communicate with those around him. He still goes to speech and physical therapy sessions.**

**Adham would like to say:**

**I like to play with things that make sounds.**

**I love surrogate mother 'Shahd' very much. She also loves me and sits and plays my favorite games with me.**

**My favorite colors are red and orange.**

**Lastly I'm very thankful to be part of AISondosFoundation for Special Needs family, and thankful to all our sponsors.**
