

My name is [Alaa gamal ashraf](#). I joined ALSondos Foundation for orphans with special needs in 2017/12/28. I'm four years old now.

Suffers from congenital deformity of the feet (clubfeet)

A weekly gypsum was done on his feet until it were ready for surgery.

The tendon lengthening of his feet was performed.

Alaa is now able to walk without anyone's help.

He is also able to talk and communicate with others.

The child is still receiving speech and skill development sessions, to get better.

Alaa would like to say:

I love my surrogate mother 'donia' so much she takes care of me.

My favorite color is green

I love playing with colored building blocks.

My favorite fruit is pomegranate.

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
