

My name is **Mahmoud Hazem Saad**. I joined ALSondos Foundation for orphans with special needs in 2017/5/6. **I'm six years old now.**

Mahmoud suffers from brain atrophy, intellectual, mental and motor disabilities and has an enlarged head. He was unable to speak or move - after doing physiotherapy and speech therapy sessions, his condition has improved and he is able to speak in an understandable way and communicate with others. He can move on his own without anyone's help.

Mahmoud would like to say:

I love and enjoy playing football, playing with colored cubes and coloring.

My favorite fruits are bananas and apples.

My favorite color is orange.

I love surrogate mother 'Dalia' very much.

I also am happy with the people who come to visit me - I love playing with them.

Lastly I'm very thankful to be part of Al Sondos Foundation for Special Needs family, and thankful to all our sponsors.
