

My name is **Mohamed Ismail Ibrahim**. I joined
ALSondos Foundation for orphans with special
needs in 2019/4/24.

I am three years old now.

Mohammed suffers from a lack of white matter growth in the brain, which affected the lack of oxygen during birth.

This led to a congenital defect in the retina and led to complete detachment.

He needed to remove the vitreous, repair the retinal detachment, and remove the damage to the retina

An eye operation was performed.

Muhammad was suffering from a delay in movement, but after doing physiotherapy sessions, he is able to walk without any help and control his movement.

He is still receiving physiotherapy, speech and skills development sessions.

**Muhammad would like to say:
my favorite surrogate mother "Engy"**

My favorite game is colored building blocks.

I like to collect my favorite color "**Red**".

My favorite fruit is banana.

Lastly I'm very thankful to be part of Al-Sondos Foundation for Special Needs family, and thankful to all our sponsors.
