

My name is Youssef Abdullah Youssef Musa. I joined ALSondos Foundation for orphans with special needs in 2019/12/3. I'm two years old now.

Youssef suffers from a delay in the growth of the white matter in the brain, which led to a delay in the nervous system

He also suffers from short stature and growth delay

Youssef is subject to medical and treatment follow-ups.

Youssef is now able to do some basic things like standing and moving around without help

He also became able to pronounce words and became able to communicate with others

This progress makes us very happy because he is able to express himself and his needs

Youssef is still receiving speech and skill development sessions.

Youssef would like to say:

My favorite fruit is banana

I love surrogate mother 'Amira' very much.

I love and enjoy playing car toy

Enjoy listening to cartoon songs too

My favorite color is yellow.

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
