

My name is **Youssef Ibrahim Abdullah**. I joined ALSondos Foundation for orphans with special needs in 2020/10/13. I am two years and ten months old now.

Youssef suffers from a lack of white matter growth in the brain, which leads to a motor, mental and speech delay

He also suffers from a very small hole in the septum between the atria, after the follow-up, the heart condition improved.

He also suffers from weakness in the lower part of the muscles of the legs and pelvis.

He was unable to stand or move but now his condition has improved and he became able to stand up and move without any help.

He is also subject to medical and therapeutic follow-ups

On the positive side also in the case of Youssef, he became able to pronounce some words, communicate with others, and express himself and his needs.

He still goes to skill development and speech sessions.

Youssef would like to say:

My favorite color is red.

I love and enjoy playing colored cubes ,also i love games that have a sound

My favorite fruit is Guava.

I love surrogate mother 'Reham' very much. She takes care of me and plays with me a lot

Lastly I'm very thankful to be part of AlSondos Foundation for Special Needs family, and thankful to all our sponsors.
