

My name is Sabreen Elsayed Ahmed. I joined ALSondos Foundation for Orphans with special needs in 2017/9/23. I'm seven years old now.

Sabreen suffers from a mental and motor disability, and an enlarged head. She also had a problem with the eyes' squint, but after an operation her eyes became better.

Sabreen also couldn't speak well but after speech sessions, she is able to speak better.

She couldn't move either, but after physiotherapy sessions she is able to walk and play without anyone's help. She still go to physical therapy sessions and speech sessions.

Sabreen would like to say:

I love my surrogate mother 'Doaa' so much and I like playing with her.

I love green apples very much, it is my favorite fruit.

My favorite color is red - I love anything in this color.

I love playing with colored cubes with others and coloring too.

Lastly I am thankful to be part of AISondos family for kids with Special Needs like me, and very thankful to all our sponsors.
