

My name is **Haneen Ahmed Ali**. I joined ALSondos Foundation for orphans with special needs in 2017/8/1. **I'm five years old now.**

Haneen suffers from intellectual disabilities, speech and attention deficits

After the speech therapy sessions, Hansen's speech condition has improved.

Now that she speaks and communicates clearly and smoothly with others, and speech is continuous.

And after the skills development sessions, her mental abilities developed and she is able to do some simple motor and manual skills

She still goes for skills development and speech therapy sessions

Haneen would like to say:

My favorite color is red like the color of my favorite fruit apple

My favorite game is to put together colored cubes

I love my surrogate mom 'Yasmeen' so much.

I feel a little shy when I see new people, but at the same time I feel happy that they come to see me and play with me

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
