

My name is **hend fathy mansour**. I joined ALSondos Foundation for orphans with special needs in 2020/12/1. **I'm one years old now.**

Hind suffers from a congenital defect in the upper extremity and the presence of one finger in the left arm.

X-rays were done and found that the bones of the hand did not grow, and she needs a follow-up at the orthopedic clinic.

X-rays were done again after a year to install a prosthetic limb.

Hend became able to move without any help.

Now she becomes able to pronounce some simple words such as (apples - bananas - cat – horse - car - plane) and recognize parts of the face after speech sessions and skills development, and the child is still receiving the sessions.

Hend would like to say:

I love playing with my doll a lot while listening to children's songs

My favorite fruit is banana

I love surrogate mother 'Amal' very much.

My favorite color is green.

Lastly I'm very thankful to be part of Al-Sondos Foundation for Special Needs family, and thankful to all our sponsors.
