

My name is Huda Said Masoud. I joined ALSondos Foundation for orphans with special needs in 2015/9/7. I'm ten years old now.

Huda suffers from severe mental, motor and speech disabilities

She also suffers from atrophy in the brain cells and the north side.

after doing physiotherapy and speech therapy sessions her condition has improved.

Huda is now able to stand up and walking with the help of others.

And speak in an understandable manner, and she is able to communicate with those around her.

She still goes for Physiotherapy sessions and speech therapy sessions.

Huda would like to say:

My favorite color is yellow

My favorite game is the colored cubes.

I love bannana so much- it is my favorite fruit,I can eat it easily and I also like the taste of it very much

I love my surrogate mom 'soha' so much, She always takes care of me

Lastly I'm very thankful to be part of AISondos Foundation for Special

Needs family, and thankful to all our sponsors.
