

My name is Wafaa Ahmed El-Sayed. I joined ALSondos Foundation for orphans with special needs in 2019/4/17.

I'm three years old now.

Wafaa suffers from a lack of white matter in the brain, which leads to mental, motor and speech delays

She also suffers from short stature and poor growth.

Wafaa is undergoing periodic follow-up and pharmacotherapy.

After doing physiotherapy, her condition has improved now she is able to move without any help

She is also able to communicate and talk with others thanks to speech sessions and skills development

She is still receiving speech and skill development sessions

wafaa would like to say

I like to play with things that make sounds and listen to children's songs

I love my surrogate mother "Donia" so much she takes care of me

My favorite color is yellow.

I like apple very much its my favorite fruit.

I love hearing and watching children's songs and I am very attracted to the sounds I hear and I love to imitate them and make movements and sounds like them.

My favorite games are dolls, puzzles, and colored cubes.

Lastly I'm very thankful to be part of AISondos Foundation for Special Needs family, and thankful to all our sponsors.
